

You'll play the games,
You'll face the trials,
You'll meet the challenge,
Of these magic isles.

AFTERSCHOOL

STEAM Learning Adventures

At Challenge Island®, we understand that true **STEAM** Education does not take place in a vacuum – rather, it should touch every corner of the curriculum. We believe that inspiring kids to be **Curious** and **Inquisitive** while gearing them with **Global Perspective** and **21st Century Skills**, prepares them to thrive in today's complex, interconnected world. We are committed to helping students develop a **Growth Mindset** and **Courage to Take Risks** and **Make Mistakes**. We infuse this core Mission into every **Challenge Island Experience**. Every semester our Challenge Island® Afterschool Adventures take place on a unique **Thematic Island** where students visit different **Destinations** each week. Every weekly destination presents students with a different challenge that uniquely intertwines **Project Based Learning-Based Challenges** with **Science, Technology, Engineering, Art and Math** with other core curricular disciplines including **ELA, History, Social Studies, Geography, World Cultures, STEM Careers, Social Emotional Learning** and Much More!
